

### PROFESSIONAL GRADE LANDSCAPE EDGING

Aluminum Edging

> Steel Edging

Aluminum Paver Restraints

Plastic Paver Restraints

> Plastic Edging

### **Our Philosophy**

Landscaping is the most visible and noticeable feature of a house, building, park, streetscape or any other project. A project never looks complete until the landscaping is added. The landscaping should have clean lawn lines with sharp borders and have well defined bed areas and walkways. Sure-loc edging adds crisp, clean lines which defines the spaces and makes the difference between a good landscape and a great one.

Making beautiful, functional landscapes requires knowledge, preparation, and hard work. Helping these landscapes withstand the test of time, requires Sure-loc Edging. When specifying Sure-loc edging, an architect can be confident that their design will be maintained for a lifetime.

### **Our History**

Sure-loc Edging Inc was founded in 1992 when the owner, Roger Blauwkamp, saw the need in the market for, and designed, an aluminum edging that didn't have overlapping joints and had end stake adaptors that would allow staking at any point. Since then our company has expanded our product line to offer a complete line of landscape edging.

# Our Products

# MADE IN THE U.S.A. from recycled material

Sure-loc manufactures and supplies a complete line of landscape edging products including: Aluminum edging, Steel edging, Aluminum Paver Restraints and Plastic Paver Restraints.

Sure-loc aluminum edging is manufactured at our home base in Holland, Michigan and most of our products are made in the U.S.A. from recycled material.

Sure-loc products have grown to be recognized globally for their quality and features. In fact it has been said that we are "ridiculously obsessed with quality."

1

### Sure-loc Aluminum Edging Benefits

- Lifetime performance makes the cost of aluminum edging lower than any other product.
- High strength aluminum alloy withstands years of maintenance abuse
- The resilient flexibility of aluminum allows for smoother curves.
- Crisp, straight lines can be achieved with minimal effort.
- Aluminum is recycled & non-toxic with excellent corrosion resistance & high thermal conductivity.
- Aluminum edging is light weight, forms easily and can be cut to length at the construction site with minimal effort which saves time and lowers installation costs
- Aluminum edging will NEVER: rust or corrode like steel edging; rot, fade or splinter like wood edging; or crack and become brittle like vinul and plastic edging.
- Can be installed with ease, and creates beautiful curves and crisp straight runs
- · Has virtually no maintenance

Stakes are below grade and therefore not seen in finished project

### **End Stake Adapters**

Allows for staking at any point. Available in all colors & depths

**Dual Stake** Locking System

Creates seamless connection with no overlapping joints

**Dual Stake Pockets** Guides stake straight down & holds stake securely to edging

**Anti-Frost Heave** Technology

Stake pocket accepts stakes at 45<sup>0</sup> angle to keep edging in ground

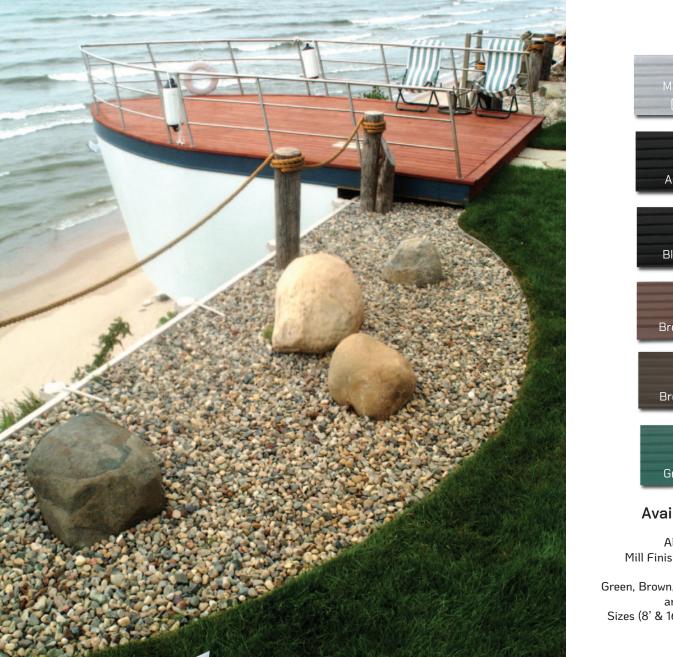

12'

Wider, more rigid stakes available in all colors, in standard 12" length or extra long 18" length for sandy soil.

# CRISP-EDGE<sup>™</sup> Aluminum Landscape Edging

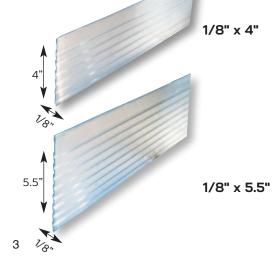

**Available Finishes** 

All sizes are available in Mill Finish and Black Anodized.

Green, Brown, Bronze & Black Paint are available in 1/8"x 4" Sizes (8' & 16') and 3/16" x 4"x 16'.

**CRISP-EDGE<sup>TM</sup>** Primarily used in residential and light commercial applications where greater flexibility is desired. Prolonged straight runs are possible but will require additional labor. Applications include, but are not limited to, planting beds, tree rings, paver walkways and paths.

Edging is packaged 15 pieces (240') per box (16 ft sections) or 15 pieces (120') per box (8 ft sections).

Available colors: Mill, Black anodized, Black paint, Brown paint, Bronze paint, green paint.

**5.5" CRISP-EDGE<sup>TM</sup>** Similar applications as  $1/8" \times 4"$  but used where additional depth would be beneficial.

Edging is packaged 15 pieces (240') per box (16 ft sections). Available Colors: Mill, Black anodized

**End Stake Adapters** Available in all colors & depths

3/16" x 4"

3/16" x 5.5"

3/16" x 8"

Edging is packaged 5 pieces (80') per box (16 ft sections). Available Colors: Mill, Black anodized

### SURE-LOC ALUMINUM EDGING INSTALLATION INSRUCTIONS

Step 4. Align "L" shaped e insert stakes partially in poo

ha

using

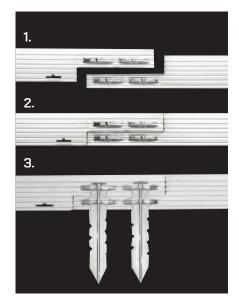

Step 5. Cut edging at end of bed using a hacksaw

Splice Ends with End Stake Adapter

# SLIDE-EDGE<sup>TM</sup> Professional Grade Sliding Aluminum Landscape Edging

Slide-Edge telescopes together providing fast, flexible & simple installation.

- High quality 6130 grade aluminum
- Cut and connect anywhere allowing for flexibility & adjustability during installation
- Lifetime performance, minimal maintenance

"Invisible" dual stake pockets that can't be seen once installed creating a seamless appearance

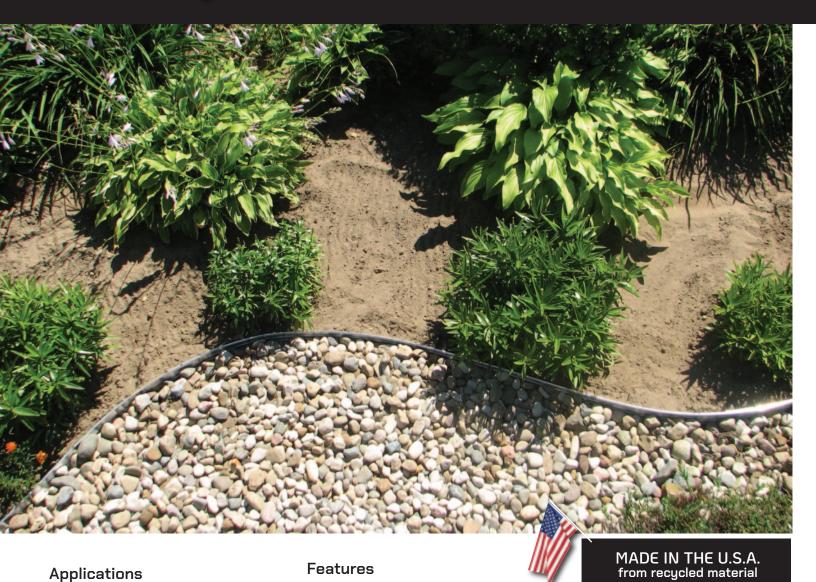

12" heavy duty Aluminum Stakes are included

### SIZES & FINISHES AVAILABLE

Thickness:	1/8" (3.2mm)
Height:	4" (102mm)
Lengths:	7'10" (2.39 meters) or
	16' (4.88 meters)
Finishes:	Mill Finish, Black Paint,
	Brown Paint, Bronze Paint

### **Applications**

- LANDSCAPE BEDS
- TREE RINGS
- WALKWAYS & PATHWAYS
- BRICK OR STONE PATIOS
- GARDENS
- DRIP EDGES
- AND MORE

### Features

- Easy "sliding" installation
- Permanent & virtually maintenance free
- Will not rust, rot, crack, or become brittle
- · Creates straight runs or curves with ease
- Our most cost effective aluminum edging

### Easy to Install: Simply slide Ends together & insert spikes

For How-to Install video & detailed instructions, scan QR Code or visit: surelocedging.com

# Installation Instructions

1. Dig a 4" Trench

4. Cut edging to length

2. Place Edging in Trench

5. Hammer stakes at 45º

3. Slide edging together

5. Backfill 1/2' below edging

Available Finishes Black Mill Bronze Green Brown

4 - 6ft Sections aluminum edging (24 ft total)

12 - Metal Stakes

are available in all colors

# **BLOCK L-EDGE™** 1/8" Thick Aluminum Paver Restraints

### **BLOCK L-EDGE™** 1/8" Thick Commercial Aluminum Paver Restraints

Durable extruded 6063 alloy aluminum is used in this strong yet flexible restraint that can create 90 degree angles without cutting. The joints do not overlap creating a seamless connection and allows for no loss of material. The V-notch base allows for easy installation for both straight and curvilinear runs. Available in high depth (2.5" H) standard height (1 5/8" H) and low profile (1 1/8" H) which is ideal for architectural hardscape stones such as flagstone, bluestone, granite and more. The perfect choice for the serious professional.

# **REVERSE L-EDGE<sup>™</sup>** Aluminum Paver Restraints

### A18RPR

### **REVERSE L-EDGE™**

### **Reversible Aluminum Paver Edging**

will give your next paver brick project the strength and longevity it deserves. Sure-loc paver restraints give you the durability of aluminum, while allowing for design freedom.

You can achieve rigid straight runs, free flowing curves, and sharp corners without any tools. Sections join together with included hardware and stake into the ground with standard landscaping spikes to ensure a solid foundation for your project.

### **Quality Features:**

- Aluminum will not rust, rot, or become brittle.
- Non-overlapping joints minimize wasted material.
- Design allows for standard and reverse installation.
- Edging is completely unseen once installed.
- Straight runs, curves, and corners can be made without tools.

### A1838M48

# EZ L-EDGE<sup>™</sup> Aluminum Paver Restraints

This Aluminum paver edging kit is perfect for sidewalks, patios and even driveway installations. The 1 3/8" tall L shaped profile can be installed with horizontal anchoring tabs adjacent to or underneath the pavers. It will not rust or rot and is unaffected in hot climates. Conveniently packaged in a 48ft kit which includes 8 pieces of edging and 24 spikes.

13/8"

A1838M48

#### Size Information:

Length: 6 ft (1.8 M) Height: 1 3/8" (35 mm) Flange (Base Width): 1 1/8" (28.6 mm) Thickness: 1/8" (3.2mm) Feet per box: 48 ft/ 14.6 M (8 sections) Included Spikes: 24 per box

Step 1 Prepare & Compact Base. Extend 6"-12" beyond edge of installation

**Step 3** Install pavers 1/8" - 1/4" higher than final grade.

**Step 5** Connect edging with 3' sliding connectors then anchor edging with spiral steel spikes.

**Step 2** Screed (level) bedding sand evenly over base to thickness of 1" - 1 1/2"

**Step 4** Mount Sure-loc laver edging directly to base (not in bedding sand) facing away from pavers.

**Step 6** Compact the pavers and spread, sweep joint sand into joints.

Width: 2.5" (6.35 cm) Thickness: 3/16" Feet Per Box: 160 ft

# STEEL-EDGE<sup>™</sup> Steel Landscape Edging

Sure-Loc steel edging offers your landscape design a permanent solution to edge control. With a variety of sizes to choose from, steel edging gives you strength to stand up to the most demanding applications and flexibility for creative design possibilities.

### STEEL-EDGE<sup>™</sup> Shot Blast Steel Surface Preparation for long lasting durability

### **Quality Features:**

- Will not become brittle or decay compared to wood or plastic edging.
- Is extremely durable and is not easily damaged by maintenance equipment.
- Stays in the ground due to our dual stake locking system and it's substantial weight.
- Creates a permanent and maintenance free solution for all your landscape edging needs.
- Maintains strict material tolerances, ensuring no compromise in thickness of edging.
- Has high quality powder coating to ensure the material is evenly coated, fully covered, and will not chip or fade like spray or vat dipped paint.
- Powder coating also makes Sure-loc Steel edging resistant to PH swings in highly alkaline soils, minimizing corrosion.

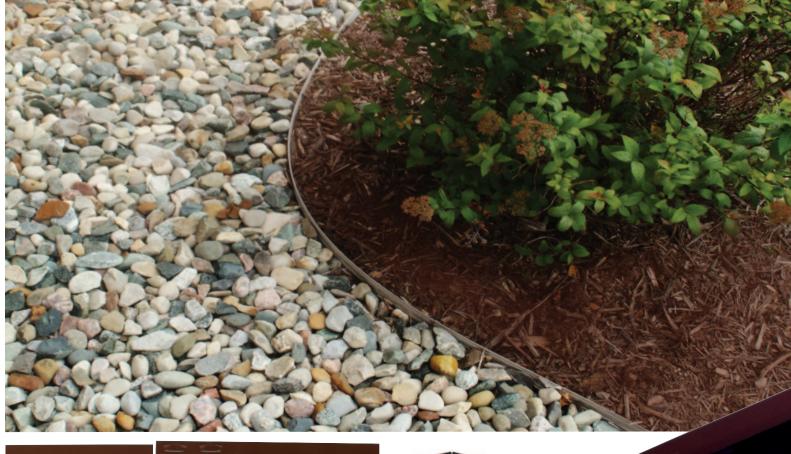

We are the first and only manufacturer in the nation to use the Shot Blast System. This enables the paint to adhere properly to the metal surface ensuring a professional look that lasts far longer than any other steel edging on the market.

# SURE-RUST<sup>™</sup> Steel Edging

Also available is our Sure-Rust material that is self-weathering. The surface rusts when exposed to weather and inhibits deeper penetration. Developed to eliminate the need for painting, the rust finish is a popular alternative for an industrial or more rustic appearance. The material recedes within its natural surroundings. Available in thicknesses of 14ga, 12 ga, 1/8", 3/16" or 1/4" and in lengths of 8', 10' and 16'.

14 ga. x 4" x 10'

1/8" x 4" x 16'

3/16" x 4" x 16'

1/4" x 5" x 16'

.070 - .075" Average thickness. Primarily used in residential applications where imaginative, free-form design is combined with long-term performance and strength not found in wood or plastic edging.

.120 - .125" Average thickness. Primarily used in residential applications where flexibility and durability are a necessity. This versatile edging will meet most landscape needs. Applications include, but are but are not limited to, planting beds, tree rings, paver walkways, paths, and mulch bed divisions. 24" Radius is possible.

.182 - .188" Average thickness. Primarily used in commercial, industrial, institutional projects, and other high traffic areas. Straight runs are easier than with 1/8" material with only slightly reduced flexibility. Applications include, but are not limited to, driveways, asphalt,maintenance strips, running tracks, pathways, and bed division. 36" radius is possible.

.20 - .25" Average thickness. Primarily used in commercial, industrial and high traffic areas. Heavy duty edging provides the ultimate strength and rigidity. Applications include asphalt and gravel retention in driveways, paths, and maintenance strips, as well as bed divisions and mulch retention in high traffic areas. 72" radius is possible.

# **ELITE-EDGE™** Plastic Landscape Edging

# **ELITE-EDGE™**

A premium blend of polyethylene gives this lawn edging its superior flexibility, strength and resistance to weathering. Elite - Edge features a height of 5" from top to bottom a longer V-lip to help prevent frost heave and a 1" round top bead. Each 20ft section weighs 6 lbs.
